

DISPATCH

Our Revolutionary 24/7 Dispatch Solution The 911 Console with Unparalleled Options

The ultimate solution for the 24/7 command and control 911 dispatch facility, the innovative Evans Dispatch™ console is truly in a class of its own. With years of industry research, client feedback and design expertise involved in its creation, the Dispatch™ console doesn't just meet industry requirements but exceeds them unlike any other product in the marketplace.

Designed to be the 911 dispatch console of the future, the Evans Dispatch™ incorporates both innovative features and configuration options that are destined to change today's dispatch facility. By incorporating Evans' patented ergonomic technology, an innovative modular structure that allows for both full lift or center lift work surfaces and unique functional rear wall options, plus unparalleled equipment and cable management, we are constantly striving to ensure this revolutionary console is the ultimate flexible dispatch solution.

A dynamic option-packed console that has been meticulously researched and designed to meet the rigorous requirements of the public safety/ 911 communication center, the Dispatch™, with its numerous operator benefits, simply has no equivalent.

Design Features

Superior Ergonomic Design

Meeting or exceeding standard ergonomic requirements, the Dispatch™ design features two heavy-duty lift columns and easy touch-of-a-button work surface height adjustability, an ADA-compliant separate articulating adjustable keyboard platform, and our patented ergonomic soft waterfall nosing on all worksurfaces - just to name a few.

Durable and Modular Structural Design

Designed with a rugged steel frame -the most structurally sound in the industry - the Dispatch™ offers unparalleled durability while its uniquely flexible, modular frame system allows for the use of standard components to create numerous configurations and functional layouts to meet your needs. This structural design also means side modules can be extended, in 6" increments, to effectively "bridge" two positions.

Unparalleled Cable Management

Four partitioned wire management channels help maintain a 6" separation between the power, data, RF and ground cabling while offering hard mounting points for optional cooling fans. Innovative integrated cable management "hinged elbows" keep equipment cables from crimping or pinching while the four wire management energy chains ensure clean cable flow from the work surface level monitors to the console cavity.

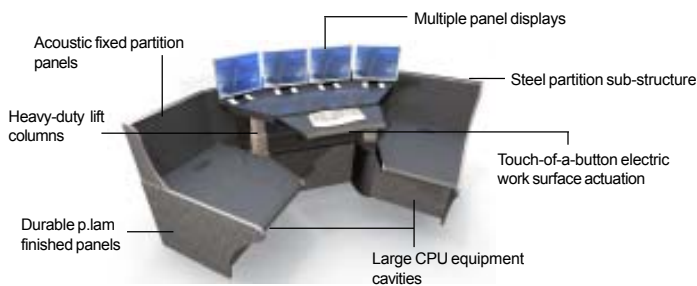

Ample Equipment Storage and Easy Access

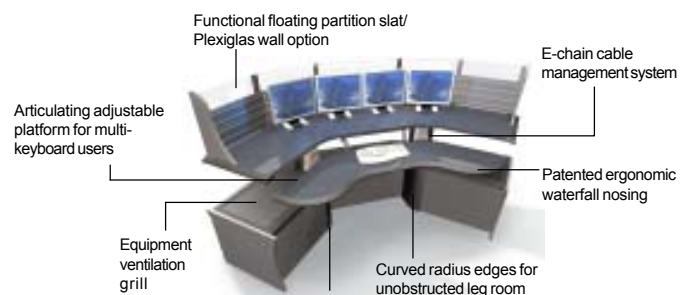

With two large equipment cavities, Dispatch™ easily accommodates up to 6 CPU's to avoid the need for outboard storage. Mounted forward-facing on slide-out shelves with an innovative cable management system, equipment is easily accessible for servicing from both the front and rear panels to avoid disturbing users during critical operations.

Unique Rear Wall Options

Evans is setting industry standards by offering unique and functional fixed or floating rear partition options to meet all your operator needs, such as functional slat wall, slat/Plexiglas combination wall, cork panels and even sound-absorbing Homasote panels.
