

# UNITY ARM 2.0

**EVANS**  
DESIGNS & EQUIPS MISSION CRITICAL OPERATIONS

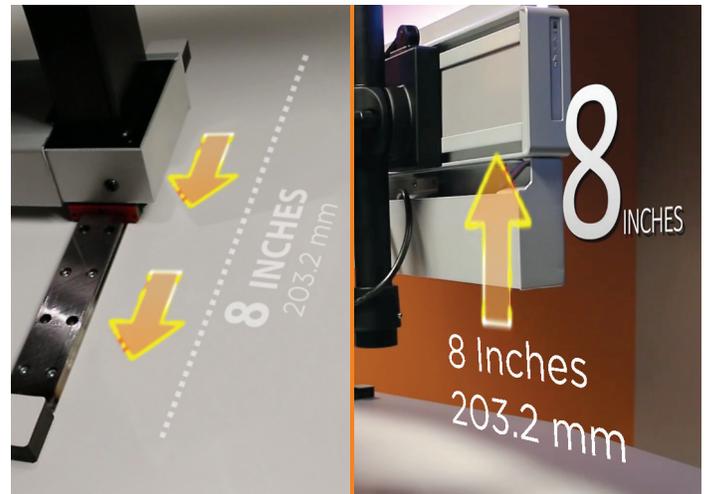

## THE PINNACLE IN MONITOR MOUNTING SYSTEMS

Engineered for performance, comfort, flexibility, and durability, Unity Arm 2.0 offers the pinnacle in monitor mounting systems, providing users the ultimate in ergonomic comfort.

The optional electronic motors offer programmable height and focal depth settings via the touch of a button or with our optional EnviroLinc touch control interface. Adjust the height and focal depth of the monitor arm in several configurations.

Users will appreciate the high quality and high strength precision glide system, available in both the manual and automatic control options. Front/Back and Up/Down movements can be manual for cost-effectiveness or automated for ease of use. Unity Arm 2.0 comes with an enhanced integrated cable management and power distribution hub allowing for streamlined cable routing to your display monitors.

The Unity Arm 2.0 is designed to withstand the demands of 24/7 mission-critical environments, and is backed by EVANS iron clad guarantee- Lifetime on the structure and a 5 year, limited warranty on electrical components.
